## "Building Relationships."

At T. Gene Edwards companies, we believe that anything we do is measured with integrity.

Integrity in our people allows us a foundation in trust. We believe integrity means our word is our bond. We instill trust, as people, as partners, and as employees

Our success is based upon the building of relationships with our clients.

By building a close relationship with our clients, this allows us to share in our clients' vision they have for their projects.

Great achievements don't simply spring up from nothing. At some point, someone with a vision must plant their idea in the ground and make it grow.

At Edwards, we believe our ability to transform our clients vision and grow it to final completion, can only be done through an unwavering dedication to quality and craftsmanship.

**NUCOR**

## Specialized Manufacturing & Industrial

"Building Relationships."

T. Gene Edwards is one of the founding members and is proud to represent one of the nation's largest steel manufacturer; and one of the largest building manufacturers in the nation, **NUCOR** Steel. Our companies both have similar philosophies in that we both have a great commission to be as environmentally conscious as possible.
